## Swati (9 Months)

Few days back I noticed that my daughter Swati who is just 9 months is having difficulty in breathing and had fever and cough. We never thought that her illness could be related to her heart we thought it's a common cold.

As her cough was worsening day by day we took her to the nearby hospital wherein the doctors were quick to diagnose that Swati condition is critical and they suggested us better to take her to the Multispecialty hospital in Delhi.

We came to Delhi and took her to the Fortis Hospital in Gurugram. We met Dr Deepak after doing the eco and other tests he told us that our daughter is suffering from heart problem and she needs urgent surgery. If the surgery is not done there is a life risk.

And the cost of the surgery will be Rs 2,50,000/-

My husband and myself were heartbroken as our is a poor family. My husband is a farmer and earning 8000/- to 9000/- per month. Its impossible for us to arrange this much amount.

**I am a helpless mother. I beg Diya India and Its supporters to please help me and save my Baby's Life.**

**Please, Please Help.**
